Election Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 to 2 and 4 through 9, drawn to a series of derivatives embraced by formula [II] and its method of preparation, classified in class 560, subclass 55.
- II. Claims 3, 12, 13, 22 and 23 drawn to different methods for the preparation of derivatives described by formula [V], classified in class 562, subclass 468.
- III. Claims 10, 11, 20 and 21 drawn to different methods for the preparation of compounds described by formula [III], classified in class 560, subclass 55.
- IV. Claims 14 through 19 and 24 through 28, drawn to different methods for the preparation of compounds described by formula [IV] classified in class 562, subclass 405.

Inventions IV, III, II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In

the instant case the inventions are distinct, each from the other because of the following reasons:

- Each one of the above Inventions are different from each others because a given reference anticipating or suggesting the any of the above inventions under the meaning of 35 USC 1023 or 35 USC 103, respectively, does not necessarily anticipates or render obvious any of the other inventions under the meaning of the said articles.
- Each invention is drawn to compounds or method for the preparation of compounds wherein each one of the claimed or prepared compounds have a particular formula different from each other.
- Classification of each invention is different in class and subclass.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and a search required for a given Group is not required for any of the other Groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1625

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
